

## Super Glue Corporation News: February 2014

## Fun and Easy Mailbox for Valentines

Over the years, Valentine's Day has become more and more about consumption and less about crafting. In years past, kids and adults alike would hand make and exchange Valentines with loved ones. These days, however, most people simply buy Valentines featuring the latest cartoon characters. So if you're looking for a great holiday-related craft to do with your kids this year, why not help them create their own Valentines mailboxes with our [Front Porch Treasures Glue Tape Dispenser](#) and some simple supplies.

## A Use for Super Glue Millions of Years in the Making

In a recent story published online by [The College of William and Mary](#), they reported that the remains of a seven-million-year-old whale were unearthed along the York River in Virginia. The find was considered tremendous, both for the size of the specimen and the relative rarity of whales from this era in this region. But our interest mainly lies in the way they kept this large, fragile fossil intact throughout the excavation: [Super Glue!](#)

## Quick and Easy Rear View Mirror Repair

Have you ever had the rear view mirror in your car suddenly become separated from your windshield? If this has ever happened to you, then you know the lost feeling that often accompanies this kind of mishap. After all, rear view mirrors have no discernible means of attachment to your windshield. There are no bolts, screws, or fasteners of any kind, just a smooth windshield and the plastic rear view mirror. That's where our [Pro Seal Rear View Mirror Adhesive](#) (also available under The Original Super Glue Corporation brand) comes in handy.

## Happy Chinese New Year: The Year of the Horse!

Friday, January 31, 2014 is the Chinese New Year. We thought we would share a video with you in honor of The Year of the Horse and making things new! It's a great DIY video with some helpful tips for you. It shows a plastic horse being repaired using baking soda and [super glue!](#) Baking soda and super glue together create a great substrate that bonds easily to plastic and can be molded and sanded once dry. Check it out on [YouTube](#), courtesy of WickedMule89.
