## Super Glue Corporation News: July 2014

### Summer's Here and So is Seashell Art

Summer is officially here, providing the opportunity for arts and crafts DIYers to create some seasonally-inspired pieces. One of the best materials to use this time of year is seashells. Using rare shells or a variety of shells, you can create virtually any decoration you can imagine. Although some seashell art may be a little challenging to pull off with your kids, you can create a fun crafts project using anything you have handy. For instance, create a unique seashell candle (like the one pictured above) to serve as a centerpiece on your outdoor table during summer picnics by using our [Super Glue Glass Adhesive](#).

### Foam Models Made Easy with Zap-O Foam Safe CA and Zip Kicker

In the past, we've shown you some great applications for Super Glue products on wood, metal, plastic, ceramic, and even paper products. But what if your hobbies include making models out of foam? After all, foam is a durable and lightweight modeling material that's perfect for

## Pro Lok is Perfect for Model Helicopters

[Pro Lok Thread Lock](#) is a must-have for many model hobbyists, especially if your model of choice is a remote control helicopter. As [this video](#) demonstrates, using a threadlocker is essential to keeping your helicopter in the air. This is because a product like Pro Lok keeps nuts and bolts in place, resisting loosening due to vibration. This will keep your model in the air, and save you the hassle of having to make repairs because of a crash. Although the video deals with RC helicopters specifically, this is also good advice for model planes and even model cars that might have similar moving parts.

## Buttons and Super Glue Make Beautiful Art

Are you looking for a DIY craft project that's fun, simple, and looks great? If so, then creating your very own mosaic out of assorted buttons may be the perfect project for you. This project calls for only a minimum of materials, and the result is always unique and colorful. And because the process is so simple, the potential for customization is

virtually limitless. This is a great craft to do with the kids; just make sure to supervise all [Super Glue](#) use.
