A Great Gift for Grads

Looking for a unique gift idea for your grad? There are a lot of great ideas out there, most of which involve creative ways to slip the grad some cash (never a bad way to go). But, while everyone appreciates the allure of cold hard cash, sometimes the occasion demands something a little more personal, especially if the grad in question is a close relation. You want a gift that is personal and meaningful, and nothing conveys that better than handcrafting and personal memories. The letter collage pictured above delivers on both counts using our [Front Porch Treasures Glue Tape](#) to hold it all together.

[Watch this video](#) to see Z-7 Debonder working in real time to break the tough bond that Super Glue provides. Although this video was uploaded five years ago, it still provides some handy tips for hobbyists around the world (and the tip is use [Z-7 Debonder](#) to disassemble Super Glued models). Impressively, this hobbyist is able to take apart a small plastic figurine in less than two minutes using our Debonder, even though the glued parts of the model had somewhat deep joints (for a miniature).

Happy Mother's Day from Super Glue Corporation

Now that Mother's Day has passed, you may think the time for crafting the perfect Mother's Day gift is gone too. On the contrary, now is the perfect time to record all of your Mother's Day memories in a scrapbook. If you are like many people – including the majority of social media users, as far as we could tell – then you took plenty of excellent photos of you with your mom on her special day. Putting those photos in a scrapbook is the perfect way to turn those fleeting digital images into something tangible using our [Front Porch Treasures Extra Thick Foam Mounting Squares](#).

Practical Science with Super Glue, Presented by National Geographic

It's always fun to see Super Glue products put to the test, especially in a safe, controlled environment. We recently came across this video from National Geographic, and boy does it fit the bill. Industrial scientists Richard Ambrose and Jonny Phillips use some industrial strength double-sided tape – not totally unlike our [Front Porch Treasures Foam Mounting Squares](#), although much stronger – to suspend themselves over a kiddie pool. Watch the video above to see how long the adhesive held up, as well as for a brief history of cyanoacrylate, that wonderful substance we've built our business on.
