CREATIVE Crankshaft Table!

Check out this amazing glass table made using a 1987 Volvo 240 crankshaft! Sean Corron, the designer and artist, stripped down the old car and saved some of the parts to use on repairs of his own Volvo; sold other parts; and decided to refabricate some of the parts that were no longer useful in cars, like this crankshaft, to create something brand new!! We think this is awesome!!

Strong Molecular Super Glue Developed

Scientists at University of Oxford have developed a "bio-inspired [superglue](#)". According to an [article](#) by Jonathan Wood, at University of Oxford, the Oxford researchers developed the bio-superglue ""by engineering an unusual protein from a type of bacteria that can cause life-threatening disease" (Streptococcus pyogenes).

How Well Do You Know Super Glue? Take a Quiz!

Recently, we saw this [super glue](#) quiz circulating on [Twitter](#) so - armed with years of product knowledge - this blogger decided to step up to the plate and ace it (er, um, I mean, take it).

Here's the link to the internet quiz: <http://bit.ly/AqIXF2>

We suggest you take the quiz now, before reading further, and see how you do. FYI: I was surprised that I missed two out of the ten! I'll let you know, which ones and why, once you've had a chance to take the quiz ... go now, take it ... then come back and finish reading this post.
