

**Super Glue Corporation News: March 2014**

**2014 Odyssey of the Mind  
Problem #4 “The Stackable  
Structure” Uses Balsa Wood &  
Glue**

Each year creative students, from elementary school through college, participate in Odyssey of the Mind programs around the world. Aspiring engineering students often choose the Balsa Wood and Glue structure building, weight bearing problem. For this problem, we recommend using our [ZAP CA glues](#). Watch this [excellent video](#), which shows the best way to cut and glue the balsa wood.

[Read the full article](#) for more info about the Stackable Structure problem and how to use our glues to solve it.

**Making More Memories with  
Extra Thick Foam Mounting  
Squares**

Our friend Frank Garcia over at Prima Marketing Inc. recently held another scrapbooking workshop using our [Extra Thick Foam Mounting Squares](#). Many people turned out to learn Frank’s tried and true scrapbooking techniques, which regularly include the use of our Foam Mounting Squares. Check out the amazing depth achieved using these adhesive squares in one of the pictures above.

If you have any pictures of your own art projects using our Foam Mounting Squares, or any other Super Glue product, we’d love to hear from you. Please [tell us your story](#) any time!

**Super Glue for Gardening: Tree  
Grafting Made Easy**

We recently came across this DIY gardening article about grafting a Bartlett pear onto a Keiffer pear tree, and it turns out they had great success using [Super Glue](#) to do so. And while we aren’t gardening experts by any stretch, the results shown above seem to speak for themselves. Judging by the picture and the information in the article, it seems like the grafted portion of the pear tree was able to thrive following this simple procedure.

**Shattered Porcelain is No Match  
for The Original Super Glue**

A broken toilet tank lid can be difficult to replace, especially if you have an older model fixture. So what do you do if you drop the lid, say on your tile floor? Just reach for [The Original Super Glue](#), of course. Continuing its reputation as one of the most versatile adhesives on the market, Super Glue was able to put the pieces back together (and keep them there) after this unfortunate bathroom mishap.

**Organize Your Electronic Cables**

We recently came across this great idea for [keeping your electronic cables organized](#). These days, most people have a handful of cables that they need at arm’s length at all times. However, these cables can often slip off the top of your desk and end up on the floor. Luckily, keeping these cables handy is fairly easy using a piece of metal, some Neodymium magnets, and [The Original Super Glue](#).

[Read the full article](#) for more ways to keep your cables organized.
