Awhile ago teacher, Robert Hazard, from Kennedy High School in Granada Hills, California sent us these super pictures. Robert's Industrial Arts Classes made these amazing wooden cars and trucks using [The Original Super Glue epoxies](#), wood and some hard labor! The class then donated the wooden toys to disadvantaged children in the Los Angeles area. We thought this was a super idea! Our hats are off to Robert Hazard and his students for their holiday spirit!!

## Trophy Repair! Another reason to keep super glue handy ...

Loved this photo and blog entry in the "Our Little Circus" blog. What a happy moment when all the team receives their soccer trophies! Can't beat the joy ... and often ... a few minutes later ... the pain – when in the chaos of the moment the trophy gets dropped and breaks apart. Michelle, the mom and author of the blog, writes: "And exactly three minutes after this photo was taken, Dylan's trophy fell on the floor and the head broke right off. [Super Glue](#) saved the day and we ended another soccer season on a high note."

## Customer Service Challenges...

This story should give you a chuckle . . . . It cracked us up!

Everyone knows that great customer service is paramount to the success of great companies ... more often than not patience and a sense of humor are what set great customer service people apart

from average customer service people. Our customers are so important to us at [Super Glue Corporation](#) that we have been known to go above and beyond to provide superior service.

We had to laugh when we saw this story, and while it sounds a little unbelievable we have confirmed that the following (or something very similar) really did happen – we just never had confirmation of the fact that the caller was actually messing with us before now.

## Good Advice: Removing keys stuck with super glue

Here's a great story about cause and effect :) .... [La Jolla Mom](#) recently wrote about a problem she was forced to solve related to [super glue](#) (which was being used initially for creative purposes)! Her blog post is titled "If Your Husband Puts Your Keys In A Pile Of Super Glue, Here's How To Get It Off" and her acetone solution is perfect – we couldn't have said it better ourselves! [Credit: La Jolla Mom]

## Hooray for Accolades! Glue Tape Dispenser ROCKS!

**member tested & recommended**

**Glue Tape Dispenser**  
The Glue Tape Dispenser (GTD) is perfect for all kinds of projects, and it's so easy to use that even a child can use it. The dispenser holds 1/2" strips of 3/4" wide tape, and it's so easy to use that even a child can use it. The dispenser holds 1/2" strips of 3/4" wide tape, and it's so easy to use that even a child can use it.

**Window Design**  
Add a little color and character to your window with a new way to add a touch of color to your window. The adhesive-free film looks like a window to the outside world, but it's a window to the inside world.

## Bare Essentials...

Did you ever dream of leaving all of your burdens behind, packing up your essential belongings (and loved ones), and hitting the road in your RV? Well, one family the Munch's are doing just that ... Paul, Michelle and their daughter, River, are traveling around the country, living in their RV, and blogging about their experiences.

We were interested by Michelle's posting about "Three RV Living Essentials: duct tape, [super glue](#), and a good sense of humor!" What a great compliment to be included in her list of essentials!

## Fun With Balsa and Glue!

[Credits: Popular Mechanics, Ben Hewitt, Jeff Mermelstein and Dogo]

Hi-Tech is great and we know how much young people love to play video games, but once in awhile it pays to go back to some good old fashioned creativity for fun. We saw this great idea for making balsa

wood gliders and thought we'd share it with our readers.

Here's all you need according to the Popular Mechanics article:

- 1.) 1/16 – 3/32 in. Balsa Sheets and Fuselage (balsa or pine rot)
- 2.) [Wood Glue](#) or [Super Glue](#) (depending on the set time you require)
- 3.) Sand Paper for fine tuning your wings

## More Reasons To Keep Super Glue With You At All Times ;)

The new movie 2012 coming out on Friday, November 13th is a good reminder of why it's important to keep [super glue](#) with you at all times! You just never know what might come up that needs fixing .... might be a good idea to keep a couple of 12-packs with you at all times – [original](#) and [gel](#) that is ;)

## Kelp Sculptor Shares Secret Ingredient (shhh!...it's super glue!)

Vicky Y. [Credit: Sealight Kelp Sculpture] is a fan of [The Original Super Glue](#) products and recently she kindly shared the following story (and secret) with us! Vicky sculpts kelp and seaweed washed up on the Oregon Shores. She creates artifacts like baskets, figures, and even lamps using the kelp! Her secret ingredient? Super Glue!
