Model Trains, Slot Cars & More: Maintain Electrical Connections with Rail Zip

[Rail Zip](#) is a great product for cleaning and maintaining smooth tracks for trains and slot cars. It is a highly concentrated track cleaner and corrosion inhibitor that can be used anywhere you find electrical connections, plugs and fuses. It penetrates through corrosion and restores electrical conductivity while eliminating any arching or sparking. A little bit of Rail Zip goes a long way. Check out this awesome video by model train expert, [Mike Fifer](#), for excellent tips for track maintenance!

Fancy Flower Pots For Spring!

It's winter, but it's never too early to begin thinking about spring! Here's a great craft idea that will keep you busy all winter long and add glitz and glamour to your garden come springtime. This gorgeous pot was made by spray painting a clay pot white and then trimming the sides with jewel-like, flat-sided marbles. The marbles can be attached using a clear [silicone sealant](#) or [epoxy](#) ... both provide more outdoor protection from weathering than traditional glues.

Unique Wineglasses Will Suit You To A Tea!

Here's a clever way to give your Valentine's Day Party a new twist! This amazing DIY project recycles teacups into wineglasses! Presto! What a beautiful way to add a touch of tradition to your modern day, late afternoon "wine/tea party". Using [super glue's](#) clear drying [glass adhesive](#) simply attach a wineglass stem to the bottom of a teacup and within minutes you are ready to party! Check out the [Country Living](#) blog for more details on how to make them. Now, what will it be? Wine or Tea?
