Prized Fish Tales & Super Glue News . . . Here's a Whopper of a Story From one of our Talented (and pleased) Customers!!!

We are always amazed by our customers' stories involving their creative uses of The Original Super Glue® products. This tale is truly one of the most remarkable ever! As summer approaches and fishermen, and women, start casting and trolling in streams, rivers, and oceans we thought it only fitting to pass along Logan's handy, heavy-duty tip.

"I wanted to let you know how impressed I was with your product while fishing in the Florida keys last week. I have been to the keys several times and always worry about my knot strength when we are fishing for huge fish like tarpon (100-200 lbs), barracuda, sharks, etc.. After years of using your product for just about everything around the house and on my boat I thought that it could only help to put a dab on all of my knots that I tie for fishing. I am so glad I used super glue because little did we know we would be in for the fight of a lifetime. We hooked the huge Tarpon at 6:18 p.m. and landed him

just before midnight. The tarpon took us through bridges with sharp barnacles and rough edges and never stopped pulling. I was worried about the knot the entire time but I should not have been because super glue was doing its job. After landing the estimated 190-210lb tarpon I examined the knot to find it to be in the same condition as it was when we tied it. Thanks to super glue we landed the biggest tarpon of our life and have found a new partner in our tackle box.

Thanks Super Glue for helping us catch this fish!!!"

-Logan Moon (Charlotte, North Carolina)
