Hiking? Don't Forget To Pack Super Glue!

It's summer and it seems that everyone is taking a hike! Whether it's daily hiking; weekend trail hiking; or week long treks into the Sierras, hiking has gained great strides as a popular activity for all ages. Here's some information we published in our blog a year or two ago that we thought we'd send out again in case you missed it the first time ... check out why taking a little tube of [super glue](#) with you on your hike could prove to be the smartest thing you can do for yourself AND your fellow hikers ...

Heading to the beach this summer? Collecting shells and driftwood is so much fun, but what do you do with it all when you get home (or even before you leave)? ... We suggest you tuck a tube of [super glue](#) and a wooden picture frame or two in your suitcase before you leave home then when you have a great collection of shells, driftwood and maybe, if you're lucky, a piece of seaglass or two you can quickly make up a couple of 3D frames for your favorite pics from your trip!

What a fun craft idea and great way to preserve actual, tangible, memories of your sunny days and cool eves spent by the seashore!

Lego Travel Box

Traveling with kids can be a challenge primarily because of all of the gear you need to tote along. Clothes and car seats are important, but let's face it ... having TOYS with you can make the difference between easy going and not-so-easy going We love this Lego Travel Box idea we found on [Pinterest](#). This treasure chest fits easily into a child's backpack and will provide hours of fun whether you are in a car, boat or plane!
