Super Glue Corporation News: November 2009

Barnacle Glue Cures Like Blood Clots

As adhesives manufacturers and distributors, [Super Glue Corporation](#) is always monitoring the science news for interesting “glue” related stories. The ability for things to adhere themselves to other things in nature is fascinating!

Here's an excerpt from a recent [e! Science News Article](#) (Oct. 16, 2009) “Barnacles are a big problem for boats. Adhering to the undersides of vessels, carpets of the crustaceans can increase fuel consumption by as much as 25%. Ship owners would love to know how to stop these hitchhikers gluing on, but before you can learn how to disrupt an adhesive, you have to understand the curing process.”

Combat Knife “Fastener Tip” Using Super Glue

[Super Glue](#) is often used as a screw reinforcement in many wood-working and furniture-making projects. We also know that one of the strongest bonds [super glue](#) creates, between different surfaces, takes place with metal to metal surfaces.

Recently, a comment by S Willin on the Combat Knives website caught our attention. The blog posting is describing a new Boker USA Armed Forces Tactical Tanto Fixed Blade Combat knife.

Modeling Tips

We admire the attention to detail expert craftsmen demonstrate in all they do. In a blog post titled, “Friday Quick Tip – Model Holder” Grey_Death describes a technique for holding miniature models while painting on the details.

Is There Such A Thing As Too Much Caution?

A recent article and blog post about schools limiting science lab experimentation due to health and safety rules caught our attention. We are interested to hear what our readers have to say on this subject!

[PHOTO CREDIT: Times OnLine CAPTION: "Schools have banned experiments seen as dangerous, even though they teach vital skills."]

Mariah Mentions Superglue in Her New Song

"When I break, I break, I break and no superglue can fix it ... Not even a welder and a builder ..."

[The Original Super Glue](#) can fix almost everything instantly, but we do admit broken hearts are hard, even for superglue, to mend :)

Yikes! Cat Lovers Beware ...

Here's a silly super glue story for you ... In a recent blog post story entitled "Thirteen Lessons For New Cat Owners" Lesson #6 states: "Tink got into my art drawer where I keep various and sundry goodies. She bit into a tube of [super glue](#). After you quit laughing please remember Lesson #6 – Cats look really funny with paper clips, eraser nubs and stamps stuck on their faces but sooner or later you have to get them off. You will not look funny with all the scratches and puncture holes on your hands and arms that will result from this truly agonizing exercise."

So, consider yourself warned keep super glue away from children AND cats!

Robotic Pumpkins – How Cool!

Ok, just imagine this for a second ... You have a display of carved jack-o-lanterns on your porch Halloween evening and a spirited group of young teens appears at your door to trick or treat ... what fun to be able to have one of those carved jack-o-lanterns start roaming around the porch!! The self-proclaimed "evil mad scientists" blog gives all the details you need to create this awesome "rovin' pumpkin".

Original Model Ship Builder Fan

of Super Glue!

Carolyn C. shared a terrific story and pictures with us – we love hearing from creative users of our products!! According to Carolyn, her brother Tracy R. “built this ship from scratch and no instructions, so it is a true original. He used no other glue than yours.” Tracy’s favorite Super Glue Corporation products, according to Carolyn C. are “[Super Glue](#), [Zap A Gap](#) , and [Zip Kicker](#)”.
