Gecko Grip Similar to Super Glue

Isn't nature amazing?? The gecko's grip is similar to super glue!

[Check out this video from New Scientist.](#)

NCIS – Super Glue

Now, mind you, we're not condoning what they did with the [super glue](#)... but we love the show & appreciate the mention!!! [Tip: To remove super glue use ACETONE! Looks like they did the right thing there]

Pinewood Derby events have been around for decades and kids (and parents) really get into the planning and preparation involved with coming up with those winning designs. Here is a funny story from one of our customers, Rita, who told about some of the trials and tribulations involved with building her son's third place finishing car:

"I never realized how great super glue worked until I had to help my son make a derby car for Boy Scouts..."

Fly Tying Tip

Paul is one of several customers who have written in to tell us how much they like our [super glue products](#) for fly fishing, and in particular, fly tying.

[Click here to read what he told us.](#)

Custom Tap Shoes & Super Glue

Ok, we could not resist sharing this amazingly cool idea with you. Custom tap shoes using glitter and [super glue](#). The [original blog post](#) suggests using either a regular white glue like ours or for speed and strength they suggest a [super glue](#). Glitz and glamour will surely add a kick to your tap dancing skills – Go for it!

Back to College Tip – Send Super Glue Along!

Hot Tip! – Send [super glue](#) along with college students for quick dorm room repairs! Many of our best product use tips come to us directly from our customers. Here's a great story, sent in by Josiah, demonstrating just how handy a tube of [super glue](#) can be:

“My story involves a college dorm room a broken towel rack and [Super Glue](#)...”

Sculptors Like Super Glue's Strength and Instant Set Time

One of our customers, Chuck, wrote in to tell us about his unique woodworking hobby and how [super glue](#) helps: “I've been sculpting various vessels lately, from bowls to candle holders, starting from multiple glued-up layers of MDF (medium density fiberboard) and then carving the build-up with various power tools, from chain saws to grinders to disk sanders...”
